process allows individuals and companies to protect their hard work. But in order to truly be able to protect your ideas, you need to understand the basics of patenting for yourself. A practical handbook designed to empower inventors like you to write your own patent application drafts in conjunction with an attorney, *Writing Chemistry Patents and Intellectual Property: A Practical Guide* presents a brand new methodology for success. Based on a short course author Francis J. Waller gives for the American Chemical Society, the book teaches you how to structure a literature search, to educate the patent examiner on your work, to prepare an application that can be easily duplicated, and to understand what goes on behind the scenes during the patent examiner's rejection process. Providing essential insights, invaluable strategies, and

It focuses on providing the reader a practical approach to dealing with the health and well-being of people with IDD in general terms as well as in dealing with specific conditions. In addition, it offers the reader a perspective from many different points of view in the health care delivery system as well as in different parts of the world. This is the 3rd , and much expanded edition, of a text that was first published in 1989 (Lea and Fibiger). The second edition was published in 2006 (Paul Brookes) and has been used as a formal required text in training programs for physicians, nurses and nurse practitioners as well as by administrators who are responsible for programs serving people with IDD. This book is considered the "Bible" in the field of health care for people with IDD since 1989 when the first edition came out.

Intellectual property law--what it is, and how it is implemented and enforced in China--is a topic of critical importance for both foreign and Chinese companies. Intellectual Property Law of China provides an up-to-date summary of the law of intellectual property in today's China. Each of the chapters contained in this book deals with a selected topic and is authored by a leading expert in the field. The essays provide a "short course" on intellectual property law in China, dealing not only with the "black letter" law and legislation, but also with practical issues. This book is a necessary resource for IP practitioners and in-house counsel as well as business managers operating in China's increasingly regulated and complex business environment.
