This book provides insights into recent trends and innovation of technologies aiming to provide sustainable and energy efficient computing. The authors discuss approaches to provide solutions to real life societal issues and problems using sustainable and energy efficient computing approaches. The book gathers research and state of the art reviews on solutions for societal benefits by using sustainable approaches of computing. The book also intends to provide use-cases for certain real life societal problems. The book can be used by researchers of similar areas, technologists, environmentalists, educationists, research scholars and UG/PG Students as well.

The Workshop Volume from the Humans and Computers Conference documents the advanced tutorials that were presented to deepen the understanding gained from the conference lectures. It presents case studies along with accompanying exercises.

The event to provide a scientific forum that will appeal to them -individual scholars, practitioners, policy makers, especially post graduate students to present their experiences, research findings, sharing ideas and experiences. For the nature of the object being discussed is interdisciplinary, the Post-Graduate School (SPS) of Syarif Hidayatullah State Islamic University Jakarta is called to organize International Colloquium on Interdisciplinary Studies 2019 (ICIIS 2019) with the theme "Moslem Societies and Social Transformation". In 2019, this event has been held in 7-9 November 2019 in the Post-Graduate School of Syarif Hidayattullah State Islamic University Jakarta. It is the conjunction with the 3rd International Conference on Quran and Hadith Studies (ICONQUHAS2019). The event is jointly organized and hosted by Postgraduate School, Faculty of Theology (Ushuluddin) of Syarif Hidayattullah State Islamic University Jakarta, Paramadina University, and Islamic University of Jakarta. The conference papers from any kind of stakeholders and interdisciplinary studies related with Religion, and Social Related Studies. Each contributed paper was refereed before being accepted for publication. The double-blind peer reviewed was used in the paper selection.

This book offers a multidisciplinary strategy for finding new and more effective human-computer interaction approaches, in particular from a socio-technical perspective, that facilitate the exploration and exploitation of benefits that information technologies (IT) offer organizations. Though the relationship between IT and organizations is certainly very strong, it is also one of the greatest obstacles to securing benefits from their interaction. The participation of organizational users in the planning and design stages of IT interfaces is the main area of human-computer interaction, where a wealth of contributions are positively enriching both the academic and management discussions. Thus, a new approach for managing this relationship is needed, one in which the different stakeholders are suitably taken into account. Moreover, the outstanding success of the 2.0 phenomenon offers an example of a relevant platform where human-computer interaction has been widely developed and exploited. Consequently, this will influence and already is influencing – the way IT and users interact with each other. The book is based on a selection of the best papers – original, double blind peer-reviewed contributions – from the annual conference of the Italian chapter of the AIS, held in Milan, Italy in December 2013.

We have once again tested security products for smartphones running Google's Android operating system. Our report covers details of the products made by leading manufacturers. Smartphones represent the future of modern communications. In 2013, more than 1 billion smartphones were sold, a further milestone in the advance of these devices1. A study published by Facebook emphasises the importance of smartphones in our lives; about 80% of users make use of their smartphone within 15 minutes of waking up each day. At the same time, the traditional function of a telephone is becoming less and less important. The high quality of integrated cameras means that the smartphone is increasingly used for photography. As well as with photos, users trust their devices with their most personal communications, such as Facebook, WhatsApp and email. This brings some risks with it, as such usage makes the smartphone interesting for criminals, who attempt to infect the device with malware or steal personal data. There is also the danger brought by phishing attacks. These days, the use of security software on a PC or laptop is seen as essential. However, many smartphone users do not yet have the same sense of responsibility, even though their devices store personal data, private photos, Internet banking information or even company data. As modern smartphones are often expensive to buy, they are also an attractive target for thieves. Top-quality smartphones cost several hundred Euros. As it is not possible to physically prevent them from being stolen, they must be made less attractive to thieves. Consequently, many of today's security products contain not only malware protection, but also highly developed theft-protection functions, which make the device less attractive to thieves (e.g. by locking the device), and help the owner to find it again.

This book constitutes the proceedings of the 28th International Tyrrhenian Workshop on Digital Communication, TIWDC 2017, which took place in Palermo, Italy, in September 2017. The 18 papers presented in this volume were carefully reviewed and selected from 40 submissions. They were organized in topical sections named: biometric systems; emerging services with Network Function Virtualization (NFV); multimedia forensics; security protocols; software defined networks; and technologies for Internet of Things (IoT).

This book highlights cutting-edge ecodesign research, covering product and service design, smart manufacturing, and social perspectives in ecodesign. Featuring selected papers presented at EcoDesign 2019: 11th International Symposium on Environmentally Conscious Design and Inverse Manufacturing, it also includes diverse, interdisciplinary approaches to foster ecodesign research and activities. In the context of Sustainable Development Goals (SDGs), it addresses the need for the manufacturing industry to design innovations for sustainable value creation, taking into account technological developments, legislation, and consumer lifestyles. Further, the book discusses the concept of circular economy, which originated in Europe and aims to increase resource efficiency by shifting away from the linear economy. Focusing on product life cycle design and management, smart manufacturing, circular economy, and business strategies, and providing useful approaches and solutions to these emerging concepts, this book is intended for both researchers and practitioners working in the broad field of ecodesign and sustainability.

2018 LOCUS AWARD FINALIST FOR BEST FANTASY NOVEL CATEGORY "Smart, literate, funny." —Lev Grossman, author of The Magicians Someone is dead set to air the spy agency’s dirty laundry in The Delirium Brief, the next installment to Charles Stross’ Hugo Award-winning comedic dark fantasy Laundry Files series! Bob Howard’s career in the Laundry, the secret British government agency dedicated to protecting the world from unspeakable horrors from beyond spacetime, has entailed high combat, brilliant hacking, ancient magic, and combat with indescribably repellent creatures of pure evil. It has also involved a wearying amount of paperwork and office politics, and his expense reports are still a mess. Now, following the invasion of Yorkshire by the Host of Air and Darkness, the Laundry’s existence has become public, and Bob is being trotted out on TV to answer pointed questions about elven asylum seekers. What neither Bob nor his managers have foreseen is that their organization has earned the attention of a horror far more terrifying than any demon: a British government looking for public services to privatize. Inch by inch, Bob Howard and his managers are forced to consider the truly unthinkable: a coup against the British government itself. Laundry Files 1. The Atrocity Archives 2. The Jennifer Morgue 3. The Fuller Memorandum 4. The Apocalypse Codex 5. The Rhesus Chart 6. The Annihilation Score 7. The Nightmare Stacks At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
