"A clarion call for seeing the world as a whole," this philosophical bestseller takes readers on a journey through time, tracing history from the Big Bang through the 21st century (San Francisco Chronicle) Join one of the greatest contemporary philosophers on a breathtaking tour of time and the Cosmos.—from the Big Bang right up to the eve of the twenty-first century. This accessible and entertaining summary of Ken Wilber's great ideas has been expanding minds now for two decades, providing a unified field theory of the universe. Along the way, Wilber talks on a host of issues related to that universe, from gender roles, to multiculturalism, environmentalism, and even the meaning of the Internet. This special anniversary edition contains an afterword, a dialogue between the author and Lana Wachowski—the award-winning writer-director of the Matrix film trilogy—in which we're offered an intimate glimpse into the evolution of Ken's thinking and where he stands today. A Brief History of Everything may well be the best introduction to the thought of this man who has been called the "Einstein of Consciousness" (John White).

Volume Seven of The Collected Works of Ken Wilber includes: □ A Brief History of Everything (1996) "Combining spiritual sensitivity with enormous intellectual understanding and a style of elegance and clarity, [this book] is a clarion call for seeing the world as a whole.— San Francisco Chronicle □ The Eye of Spirit: An Integral Vision for a World Gone Slightly Mad (1997) uses the spectrum model to create an integral approach to psychology, spirituality, anthropology, cultural studies, and art. □ "An Integral Theory of Consciousness," an essay previously unpublished in book form, presents one of the first theories to integrate first-, second-, and third-person accounts of consciousness.

Clark Butler presents an innovative analysis of Hegel's most challenging work in Hegel's Logic -- the first major English-language treatment of Hegel's Science of Logic to appear in nearly fifteen years. Although earlier commentators on the Logic have considered standard analytical philosophy-and with it modern logic-in opposition to Hegel, Butler views it as a legitimate approach in terms of which Hegel needs to be understood. This interpretation allows him to address the rigor of Hegel's thought on several levels as at once an exercise in purely conceptual redefinition and a full-bodied work in metaphysical ontology and even theology. The result is an account of the Logic intelligible to analytical philosophers as well as non-specialists.

Utilizing a question and answer format, the philosopher and spiritual teacher discusses multiculturalism, political correctness, spiritual enlightenment, gender wars, modern liberation movements, and the course of evolution. Reprint.

The Power of Self-Knowledge: An Awakening Consciousness is written in the spirit of an African Proverb called Sankofa and contains remembrances and poetry composed by the author. "Sankofa is a word in the Twi language which translates as: "It is not wrong to go back for that which you have forgotten." Wikipedia free encyclopedia Margaret's interest in her African history began at a young age when it was not acceptable and when questioned it was as though there was shame associated to even say the word out loud. The author wrote this book to encourage the education of all of our young people on the histories of all to inspire and improve our ability to move forward, create an environment of love and respect for self as well as each other in all of our communities within our great country.
