In physics and philosophy, a relational theory is a framework to understand reality or a physical system in such a way that the positions and other properties of objects are only meaningful relative to other objects. In a relational spacetime theory, space does not exist unless there are objects in it; nor does

# Systems

time exist without events.  
The relational view  
proposes that space is  
contained in objects and  
that an object represents  
within itself relationships  
to other objects. Space  
can be defined
